

CAST Brushed Aluminum Downlight

The CAST Brushed Aluminum Downlight is a great fixture for replacing hot halogen and flickering fluorescent lights in all indoor recessed cabinet, ceiling, furniture, display-case, and accent lighting applications. With a minimalist design and eco-friendly technology, this easy-to-install fixture produces up to 400 lumens of light output while consuming only 7.2 Watts of electricity.

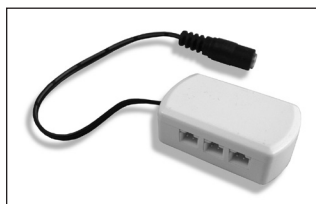

The CAST Downlight has a sturdy aluminum housing whose recessed component is 2.55 inches in diameter, with a 3.3 inch exposed lip, and is designed for a 3 inch housing in ceilings up to 1 inch thick. With a lifespan of 40,000 hours, it will be years before you have to climb a ladder to replace it. This downlight is not dimmable, and can be powered by a single one of our compact Hard-Wired Drivers with the use of a Downlight Six-Port Splitter (DI-0729). Retrofitting hot and wasteful recessed lighting has never been so simple!

Highlights

Diameter: 3.3" / Depth: 1.6"
 Cutout: 2.55"
 Lead Wire Length: 36"
 LED Bulb Type: Nichia LED
 Lifespan: 40,000 hours

Accessories: CAST Brushed Aluminum Downlight

Downlight Six-Port Splitter
 (item #DI-0729) 3.9" x 1.1" x 0.5"
 Connects up to six CAST Brushed Aluminum Downlights to a Plug-In Adapter (p. 24).
