# NORA NEWS

— NEW PRODUCT ANNOUNCEMENT —

## NEW QUARTZ RESTRIKE OPTION 6" & 8" METAL HALIDE RECESSED HOUSING

Providing light during critical restrike times, Nora Lighting's new optional Quartz Restrike lamp is your solution. Metal Halide lighting is easily affected by poor power quality and metal halide lamp technology delays the restart of the lamp for several minutes. Our new Quartz Restrike lamp provides emergency illumination during this critical restrike time. Available in our economy, commercial and architectural downlights with a wide variety of trims.

### FEATURES

#### PROVIDES AUXILIARY LAMP

Avoid safety and productivity losses during metal halide restrike time

#### XENON LAMP

T-3 DC bayonet base auxiliary lamp, 40W for 39W PAR20 and 60W for the 70W-100W ED-17

#### ARCHITECTURAL, COMMERCIAL & ECONOMY RECESSED HOUSING

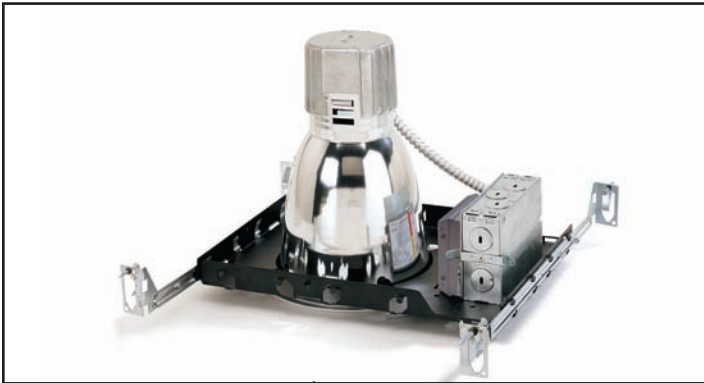

#### AVAILABLE WITH OPEN REFLECTORS, BAFFLE REFLECTOR, LENSED TRIMS & OPEN WALL WASH

39W PAR20, 70W-100W ED-17\*

**Tech Tip:** With an HID/Quartz system, minor glitches or short-duration power failures cause the metal halide lamp arc to extinguish. The quartz lamp then operates from restored normal power until the metal halide lamp cools and restrikes. Restrike usually take between 5 and 15 minutes.
